Siembidów

**ANY OF US WOULD JUMP FOR JOY ...**

and make it known to everyone if we were suddenly cured of an affliction. Modern medicine not only cures disease but also rids us of minor annoyances. With such powerful tools of healing at our disposal day and night, we often lose sight of the everyday miracles that happen when we take an aspirin, have eye surgery or a cavity filled.

Jesus' cure of the deaf man with a speech impediment in today's Gospel was certainly extraordinary! None of us could do such a work, not every a doctor could use a little spittle to heal such afflictions.

But the healing work of Christ continues in clinics, hospitals, and doctor's offices around the world. We can praise God for these wondrous things, and give thanks to God for the wisdom and insight bestowed on this world.

FESTIVAL DINNER TODAY

For information or to Register call Janice Hyde at 732-8899 or Michelle Bennett 724-2158 Ext. 250 at Catholic Charities on Genesee Street.

At week ELEVEN [11] at the end of the FIRST TRIMESTER in the development of the life of a tiny baby in the womb of its mother ... the little tiny human feet are perfectly shaped. At this point, the baby has eyelids, fingernails, and fingerprints, and can even grasp an object placed in the hand. The kidneys begin to form urine and the baby begins to mimic the movements of breathing.

From this point on, there is only growth in the size and maturation of the organs already present. All body systems are in place and active. The "baby" has a skeletal structure, nerves and circulation.
